Importance of Staffing in the Library System and Service s

Introduction
Staffing is the backbone of any library system. The effectiveness of library services larg ely depends on the quality, number, and competence of its staff. Without adequate and well-trained staff, library resources and services cannot be properly managed or delivere d.

a. Effect on Library Service Delivery

Library staff ensure that services such as reference services, circulation, cataloguing, an d user education are delivered efficiently. Professional and competent staff help users lo cate accurate information quickly, thereby improving service quality and efficiency.

b. Effect on Resources Management

Staffing plays a vital role in the acquisition, organization, preservation, and disseminatio n of information resources. Skilled staff ensure proper cataloguing, classification, and m aintenance of both print and digital resources, preventing loss, misuse, and deterioration.

c. Effect on User Satisfaction

Friendly, knowledgeable, and responsive staff enhance user satisfaction. When library us ers receive prompt assistance and accurate information, they develop confidence and tru st in the library system, leading to increased usage.

d. Staff Effectiveness (Professionals, Para-professionals, and Supporting Sta ff)

Effective collaboration among professional librarians, para-professionals, and supportin g staff ensures smooth library operations. Each category contributes uniquely to achievi ng library goals and meeting user needs.

Categories of Library Staff and Their Roles/Functions

a. Professional Staff

These are qualified librarians with formal training in Library and Information Science.

Functions:

- Collection development and policy formulation
- Cataloguing and classification
- Reference and information services
- User education and information literacy
- Library management and decision-making

b. Para-professional Staff

These staff assist professional librarians and usually have diploma or certificate qualific ations.

Functions:

- Assisting in cataloguing and shelving
- Circulation services (charging and discharging of books)

- Assisting users in locating materials
- Routine library operations

c. Supporting (Non-professional) Staff

These staff provide auxiliary services necessary for smooth operations.

Functions:

- Cleaning and maintenance of library facilities
- Security of library materials
- Messenger and clerical duties
- Technical and maintenance support

3. Major Services Offered by Modern Library Systems and Services

Modern libraries have expanded beyond traditional services to meet contemporary information needs.

a. Reference and Information Services

Providing answers to users' queries using print and electronic resources.

b. Circulation Services

Loaning and returning of library materials, including renewals and reservations.

c. Digital Library Services

Access to e-books, e-journals, online databases, and institutional repositories.

d. Current Awareness Services (CAS)

Keeping users informed about new arrivals and recent developments in their fields.

e. Selective Dissemination of Information (SDI)

Providing personalized information services based on users' interests.

f. User Education and Information Literacy

Teaching users how to locate, evaluate, and use information effectively.

4. Application of ICT and Its Benefits in Library System an d Services

Applications of ICT in Libraries

- Online Public Access Catalogue (OPAC)
- Library automation systems
- Digital libraries and repositories
- Online reference services (email, chat)
- Electronic resource management

Benefits of ICT in Library Services

- Faster access to information
- Improved accuracy and efficiency in service delivery
- Better storage and preservation of information
- Remote access to library resources
- Enhanced user satisfaction and global information sharing

Conclusion

Effective staffing combined with the application of ICT enhances the efficiency of library systems and services. Qualified staff ensure proper management of resources, effective service delivery, and user satisfaction, while modern technologies expand access and im prove overall library performance.
